(54) Title: METHOD AND DEVICE FOR DELIVERY OR OBTAINING OF A GOOD

(57) Abstract: A method for delivery of a good for a first entity (C100) is disclosed. The method comprises the steps of transporting the good by a second entity (D100) to a storage (S120) which is locked by a lock system (S110), communicating a notification to the first entity (C100) for requesting an unlocking of the lock system (S110) for the second entity (D100), sending a message via a mobile telecommunication system from the first entity (C100) to the lock system (S110) for unlocking the lock system (S110), unlocking the lock system (S110) based on the received message, opening the storage (S120), and transferring the good from the second entity (D100) to the opened storage (S120). Furthermore, a method for obtaining a good from a storage (S120) of a first entity (C100) is disclosed and devices that allow the implementation of the methods.
